

Magnesio attivato

EC FERTILIZER

Magnesium sulphate solution

Composition:

Magnesium oxide (MgO) *Water soluble* 6%

Solphoric anhydride(SO₃) *water soluble* 12%

Components: Magnesium sulphate, organic acids

PH = 5-5,2

Density = 1,15

CHARACTERISTICS:

Magnesium is a very important element and it has an important role in the plant physiology. It is an important catalyzer of several biochemical processes of photosynthetic reactions. Besides magnesium, how organic-mineral complex is part of chlorophyll molecule.

Magnesium lack show itself with early defoliation, short productiveness and leaves yellowing with leaf necrosis.

MAGNESIO attivato is a product compound with magnesium and organic acids able to complex magnesium and to make it easily relocate in the plant.

Size Kg 1 in box containing 15 pieces
Kgs 5 in box containing 4 pieces
Kgs 30 on pallet containing 30 pieces

The product is stable to standard temperature and pressure. To store to temperature between 4°C and 35°C.

The product isn't combustible.

Dose and instructions for use.

Fertirrigation:

Vegetables and flowering crops: to distribute 1-2 Kg per 1.000 sm of soil every 8/10 days.

Arboreous crops: to distribute 15-30 Kgs per hectare 3-4 times during vegetative cycle.

Vine and peach: to distribute 15-30 Kgs per hectare 3-4 times during vegetative cycle.

Industrial crops (potato, carrot, etc.): to distribute 15-30 Kgs per hectare 3-4 times during vegetative cycle.

Leaf fertilization:

Vegetables and flowering crops: ml 300-400 per 100 liters of water (to distribute 800-1.000 liters of solution per hectare).

Arboreous crops: ml 400-500 per 100 liters of water (to distribute 800-1.000 liters of solution per hectare).

Vine and peach: ml 400-500 per 100 liters of water (to distribute 800-1.000 liters of solution per hectare).

Industrial crops (potato, carrot, etc.): ml 300-400 per 100 liters of water (to distribute 800-1.000 liters of solution per hectare).

Warning:

- In covered areas (greenhouses, tunnels,) the dose should not exceed 200 g per hl of water. Leaf application should be carried out in the coolest hours of the day.

Compatibility: The product can be mixed, in the proper dose, with FERTIPLAN products and antiparasitic in general, except for oil products and having a strong alkaline reaction.

WARNING:

This product is for agricultural use only. Any other use is dangerous.

Keep this product locked away out the reach of children and pets. Do not smoke or eat while using the product.

While the FERTIPLAN guarantees the quality of the product it assumes no responsibility for damage or partial results due to incorrect application of the product or particular climatic condition and/or environment, since it cannot directly supervise its use.
